Commonly Asked Questions

How does DonorPerfect complement QuickBooks?

QuickBooks provides an easy-to-use and powerful solution for managing expenses and producing financial statements. This functionality is dramatically enhanced by DonorPerfect's features for the receipt and acknowledgement of donations. The Accounting Interface allows users to report on, and work with, detailed transaction activity in both DonorPerfect and QuickBooks with absolutely no re-entry of data.

Which QuickBooks versions integrate with DonorPerfect?

We recommend using the most current versions of QuickBooks to provide optimal features and efficiency, but DonorPerfect can integrate with most installed versions of Pro and Premier.

How Does it Work?

Gifts entered into DonorPerfect can be transferred on a periodic basis to QuickBooks. We have found that weekly transfers work best, but any transfer period can be any period specified by the user. After entering all of the donations, these entries can be exported from DonorPerfect automatically using the [Accounting Interface](#) so the data is formatted to be easily imported into QuickBooks.
