

DonorPerfect

Accounting Interface

Overview

DonorPerfect offers an interface to the most popular non-profit accounting systems. This interface allows all your gift transactions to be easily summarized by your Chart of Accounts categories and posted automatically to your existing General Ledger system.

Accounting Transfer

This program will take gift records of a certain time frame and create the required transfer file.

OK

Cancel

Date range: 02/01/2004 - 02/28/2004

Batch Type:

Formula for calculating accounting code:

GL Accounting Code

Features

- Saves time and reduces errors by eliminating the need to enter data twice
- DonorPerfect data is posted into the corresponding fields of your accounting package
- Identifies debit and credit accounts
- Full journal entries
- Summary or detailed information transfer
- User-defined codes

You can interface with:*

- ACCPAC
- American Fundware
- Business Works
- Echo
- EDS
- Great Plains
- LTC
- MAS90
- MIP
- Mirasoft
- Peachtree
- Platinum
- QuickBooks**

For a nominal fee, DonorPerfect can interface with **any additional accounting packages, as long as they are able to import data and we are given the proper data format.*

***SofterWare is a premier member of the QuickBooks Developer Network. A specialized XML Interface is available. Ask your account manager for specific information.*

DonorPerfect

Accounting Interface

Commonly Asked Questions

How does it work?

Gifts entered into DonorPerfect can be transferred on a periodic basis to the accounting system's general ledger. We have found that weekly transfers work best, but transfers can be any period specified by the user. For instance, let us assume the following gifts were entered into DonorPerfect during the week of 11/11/05 - 11/15/05:

<u>Name</u>	<u>Amount</u>	<u>Date</u>	<u>Fund</u>
John Smith	\$ 50	11/11/05	PR1
Susan Hobart	100	11/11/05	PR2
Nancy Brown	200	11/12/05	PR3
Richard Landsman	50	11/13/05	PR1
Michael Stein	100	11/14/05	PR2

When setting up the Accounting Interface, you have the option of matching DonorPerfect's GL codes to the Chart of Accounts in your accounting software. In this example, the GL codes PR1, PR2, and PR3 correspond to the accounts 4001, 4002, and 4003. The Cash Account that will be debited can also be established, in this case, it is identified as 1001.

After entering all of the donations listed above, these entries can be exported from DonorPerfect automatically using the Accounting Interface so the data is formatted to easily import into your accounting software. An example of this file is shown here:

<u>Trans Date</u>	<u>Description</u>	<u>GL Account</u>	<u>Debit Amt</u>	<u>Cash Amt</u>
11/15/05	DP Transfer	1001	\$ 100	
11/15/05	DP Transfer	4001		\$ 100
11/15/05	DP Transfer	1001	\$ 200	
11/15/05	DP Transfer	4002		\$ 200
11/15/05	DP Transfer	1001	\$ 200	
11/15/05	DP Transfer	4003		\$ 200

NOTE: In many instances, especially those in which the accounting and fundraising software are not installed on the same computer or network, it will be easier to enter these transfers manually.

How much does it cost?

\$595.
